Lab #2 – RESTful services

1. Practice to develop a RESTful service using CXF, by following the tutorial published at:
<https://www.baeldung.com/apache-cxf-rest-api>
2. Once you have succeeded to develop your first RESTful service, realize the following simple system:
 - a. A RESTful service offering resources about BankAccounts
 - b. A simple client accessing the resources and showing them to the user
